WHY SMART CABINETRY?

Customer Focused | Budget Conscious | Rapid Delivery

Smart Cabinetry has grown since 2004 into a nationally recognized brand. We work relentlessly to meet & exceed customer's expectations.

We create long-term relationships with customers, employees, suppliers, and the communities in which we live and work. These relationships, based on openness, integrity, and trust are what keep us motivated.

Our customers are our most important resource, and we work to satisfy every need.

OUR GUIDING PRINCIPLES

Integrity

The foundation for all that we do. Integrity includes honesty, decency, consistency, and courage.

Dialogue

We are open to diverse points of view and actively engage in thoughtful dialogue. We commit ourselves to broaden our understanding of our issues to better address the needs and concerns of our customers and each other.

Transparency

We ensure that information is available, accessible and understandable.

Sharing

We share knowledge and technology to advance our understanding, improve our products and environment.

Benefits

We use sound and innovative manufacturing practices and thoughtful and effective stewardship to deliver high-quality products that are beneficial to our customers and the environment.

Respect

We respect the religious, cultural, ethical concerns of people throughout the world. Our highest priority is the safety of our employees, the communities we operate in, our customers and consumers, and the environment we live in.

Ownership

We create clarity of direction, roles and accountability, build strong relationships with our customers and external partners, make wise decisions, steward our company resources, and take responsibility for achieving agreed-upon results.

Empowerment

We ensure diversity of people and thought, foster innovation, creativity and learning, practice inclusive teamwork, reward and recognize our people.

CABINET FEATURES

Standard Features

1/2" Nominal (12mm) particleboard with light maple laminate interior and designated laminated exterior.

5/8" Solid Dovetail Drawers feature four sided construction and captive 1/4" Nominal (6.4 mm) matching laminate bottom. Includes Epoxy Coated drawer slides (100 lb Dynamic)

6-way adjustable hinges are heavy duty, self closing, and concealed within the cabinet door and frame.

I-Beam Construction Rails are 1/2" Nominal (12mm) particleboard. Rails are hot melt glued into face frame, sides, and cabinet back.

3/4" Nominal (18 mm) Edge Banded Shelves provide a matching appearance with the interior of the cabinet.

Upgrade Features

5-Piece Drawer Front

Undermount Soft Close Drawer Slides (100 lb Dynamic)

Soft Close 6-way Adjustable Hinges

All Plywood Features

1/2" Nominal (12 mm) plywood with light maple laminate interior and designated laminated exterior.

I-Beam Construction Rails are 1/2" Nominal (12 mm) plywood. Rails are hot melt glued into face frame, sides, and cabinet back.

5/8" Solid Dovetail Drawers feature four sided construction and captive 1/4" Nominal (6.4 mm) matching plywood bottom. Includes Epoxy Coated drawer slides (100 lb Dynamic)

3/4" Nominal (18 mm) Edge Banded Plywood Shelves provide a matching appearance with the interior of the cabinet.

6-way adjustable hinges are heavy duty, self closing, and concealed within the cabinet door and frame.

Max & Ultimate Features*

Max Construction features a 3/4" ACQ pressure treated solid lumber toe kick.

Ultimate Construction features a 2"x6" ACQ pressure treated solid lumber base perimeter touching the floor. (Must order end skins for end cabinets)

*Max and Ultimate Constructions both have the same All Plywood Features shown to the left

COMPLIANCE & CERTIFICATIONS

Carb 2 Compliant

California Air Resources Board

CARB 2 focuses on indoor air quality, primarily on formaldehyde emissions.

TSCA Title VI Compliant

Toxic Substances Control Act

TSCA addresses the production, importation, use and disposal of specific chemicals including PCB's, asbestos, radon, lead based paint, and formaldehyde.

TSCA Title VI is the national standard that was developed based on CARB.

ICC ES

ICC Evaluation Service

ICC-ES verifies and certifies building products meet specific sustainability criteria, indicating they comply with green building codes and standards, signifying a product's environmental performance and sustainability attributes.

ANSI

American National Standards Institute

ANSI, a non-profit organization that accredits standards developed by other entities, ensuring consistency in quality, performance, and testing across different products and companies within a particular industry.

BABA

Build America, Buy America

BABA's primary goal is to ensure that the materials used in government-funded infrastructure projects are produced within the United States. Smart Cabinetry's particle board construction meets requirements. Plywood construction upon request only. Project documents must be submitted to Smart Cabinetry prior to bidding, for qualifying compliance letter to be issued.

TESTING

Testing is important. Independent testing is meaningful.

With every cabinet we build, we're committed to delivering a quality product that is safe for the people who will use it and sustainable for the world around it. And then, we put that commitment to the test.

We work with an independent, ISO/IEC 17065 accredited evaluation service to inspect, test and certify our products and manufacturing facilities to give you, and your clients, confidence in the decision to purchase our products.

FINISHES

The coatings applied to our cabinets consists of LOW VOC environmentally safe materials. All top coats and stain finishes used by Smart Cabinetry meet or exceed Green Guard Emission Standards. In addition to our environmental stewardship, our coatings have a high durability: resistance to stains, abrasions, chemical, impact, and scratch resistance are among our long list of advantages.

Smart Cabinetry’s coatings create less waste and use less energy which ultimately allows us to continue our mission to deliver above industry value at affordable prices. Naturally, however, your choice of wood species will have the most impact on the cabinet’s final appearance, because wood

grain and natural characteristics will show through stain colors. Color stains will render the actual color of the cabinet, bring out the natural beauty of the wood, and amplify those inherent “character marks”.

Softer areas of the wood will accept more stain and often appear darker than other areas. Potential natural variances in color cannot be controlled even with the latest technology in diamond tooling and sanding in multiple stations through out our facility. Differing densities inherently create different effects regardless of the hours expended selecting only the finest hardwoods.

Maple

Oak

Paint

Thermofoil

Thermofused Laminate

Maple Finishes

Maple has a smooth texture with tight, uniform grain patterns. It is generally creamy white, varying slightly from almost bright white to light pink or reddish brown. Maple contains a natural resin that causes wood to turn amber as it ages. This change, which is accelerated by exposure to natural light, is more noticeable with lighter stains. Maple may occasionally contain small mineral streaks that form naturally when trees absorb mineral from the soil.

Oak Finishes

Red oak is characterized by its open grain patterns, which vary from close-knit and vertical, to prominent and arched, with colors ranging from light tan and pink to medium dark red and brown. The color of red oak cabinetry deepens as the wood interacts with natural light. Oak may contain small mineral streaks and some pin knots.

Paint Finishes

Paint grade doors, drawer fronts, center panels, cabinet components, moldings, and accessories may feature hardwood, engineered materials (such as HDF or MDF) or a combination of both to create a beautifully finished and durable product. See individual door styles for additional details. Paint grade products have certain inherent characteristics that must be expected. Small hairline cracks may appear at joinery points on doors, drawer fronts, cabinet frames, etc. Also, some grain patterns of wood may be apparent through painted finishes. Painted finishes should be expected to show a slight color change over time. These characteristics are inherent and will not be considered defective.

Thermofoil Finishes

Thermofoil laminate doors and drawer fronts are 3/4" thick medium density fiberboard (MDF). The front and four edges of doors and drawers are covered with thermofoil laminate material. Doors are backed with white low pressure melamine.

High heat generated from the self-cleaning cycle of ovens or ranges may discolor thermofoil laminate cabinetry. It is highly recommended to use a heat shield (see page 82) or open the doors and drawers fully while running the self-cleaning cycle. Damage caused by excessive heat is not covered by warranty.

Thermofused Laminate Finishes

Thermofused melamine doors and drawer fronts are 3/4" thick and are made from melamine laminate that has been thermally fused directly to a substrate. Particle board and MDF are ideal substrates because they are consistent, uniform in strength and free of defects. Doors and drawer fronts feature matching thermofused melamine on the front and back side. Matching edge banding is utilized on door and drawer front edges to complete the process. This material has an excellent scratch and wear resistance.

High heat generated from the self-cleaning cycle of ovens or ranges may discolor thermofused laminate cabinetry. It is highly recommended to use a heat shield (see page 82) or open the doors and drawers fully while running the self-cleaning cycle. Damage caused by excessive heat is not covered by warranty.

OVERLAYS

How much of the door & drawer front cover the cabinetry frame.

Standard Overlay

This overlay shows 1" reveal on all sides.

Full Overlay

This style of overlay leaves a 1/4" reveal on all sides and in between doors and drawers. This reveal emulates the visual style of a frame-less cabinet.

EDGE PROFILES

Our door styles offer 3 types of edge profiles. The type of edge profile that your chosen door comes in can have an impact on the overall feel of your space. A reverse edge profile, for example, allows for the opening of the cabinet or drawers without the need for installation of door handles.

*Not recommended for butt door cabinetry. Slab doors depending on the regional environment climate change can decrease or increase in the dryness or humidity. This can cause doors to shrink or swell in size in a very short period of time. Cabinets should not be delivered and stored into areas of drywall mudding, painting, or open air environments. Smart Cabinetry is not responsible or liable for cabinet doors shrinking or swelling after shipping.

How to read our cabinet SKUs

Below is a diagram explaining how to read our Skus. This example displays the following about this cabinet: it's a tall cabinet, 24" wide, 96" tall, 24" deep, and has a butt door modification. For more information about our cabinet modifications see page 86.

WALL CABINETS

1. Back

1/2" (12mm) Woodgrain laminate rabbeted into ends, wood glued and stapled on top and bottom.

2. Top & Bottoms

1/2" (12mm) Substrate with light maple wood grain interior, designated laminated exterior.

3. Adjustable Shelves

3/4" Thick edgebanded particle board shelves are attached with locking shelf clips.

4. End Panels

1/2" (12mm) Substrate with light maple wood grain interior, designated laminated exterior.

5. Frames

3/4" Thick and 1-1/2" wide kiln-dried hardwood, assembled under pressure with screws. Offers maximum strength and squareness.

6. Hinges

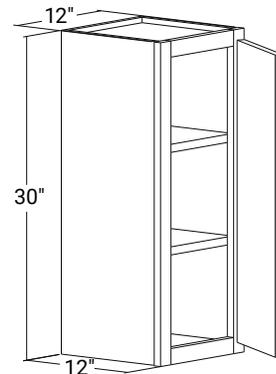

108° 6-way adjustable, self-closing concealed hinges.

WALL CABINETS

- Adjustable shelf quantities listed in () below.
- 12-39" high wall cabinets receive two hinges per door; 42" high wall cabinets receive three hinges per door.
- 6-24" altered depth modification available in 3" increments.
- 24" depth cabinets must be installed between cabinets or end panels of the same depth.

BASE CABINETS

1. Back

1/2" (12mm) Woodgrain laminate rabbeted into ends, glued top and bottom with industrial grade hot melt glue.

2. Braces

Full depth braces provide I-beam stability and convenient anchor points for counter tops.

3. Drawer Guides

Features captive roller, (100 lb) epoxy-coated stay closed side guides.

4. End Panels

1/2" (12mm) Substrate with light maple wood grain interior, designated laminate exterior.

5. Drawers

5/8" Solid dovetail drawers, featuring 4-sided construction and captive 1/4" matching laminate bottom.

6. Adjustable Shelves

3/4" Thick, edgebanded particle board shelves.

7. Frames

3/4" Thick and 1-1/2" wide kiln-dried hardwood, assembled under pressure with screws. Offers maximum strength and squareness.

8. Hinges

108° 6-way adjustable, self-closing concealed hinges.

9. Floors

1/2" (12mm) Wood grain laminate encapsulated in dado; glued all sides with industrial grade hot melt glue.

10. Toe Kicks

4-1/2" Toe Kicks with 3-1/2" inset on all standard base cabinets.

Standard construction is shown above. Shelf clips not shown. Specifications subject to change without notice. Materials may differ depending upon cabinet construction.

BASE CABINETS

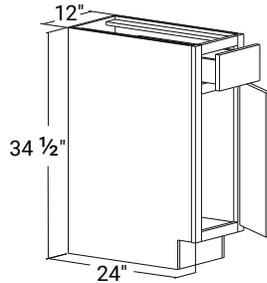

- Includes one half-depth adjustable shelf.
- Includes two hinges per door.
- 18-21" altered depth modification available in 3" increments.

TALL CABINETS

1. Back

1/2" (12mm) Woodgrain laminate rabbeted into ends, wood glued and stapled on top and bottom.

2. Tops

1/2" (12mm) Substrate with light maple wood grain interior and exterior.

3. Hinges

108° 6-way adjustable, self-closing concealed hinges.

4. End Panels

1/2" (12mm) Substrate with light maple wood grain interior, designated laminate exterior.

5. Shelves

1/2" (12mm) Thick fixed wood grain laminate shelves are included. Adjustable shelves must be ordered separately.

6. Frames

3/4" Thick and 1-1/2" wide kiln-dried hardwood, assembled under pressure with screws. Offers maximum strength and squareness.

7. Floors

1/2" (12mm) Wood grain laminate encapsulated in dado; glued all sides with industrial grade hot melt glue.

8. Toe Kicks

4-1/2" Toe kicks with 3-1/2" inset on all standard base cabinets. 93" and 96" toe detached.

9. Lower Door Height

Matches base cabinet door height (28")

Standard construction is shown above. Shelf clips not shown. Specifications subject to change without notice. Materials may differ depending upon cabinet construction.

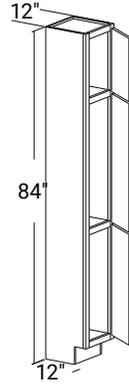

TALL CABINETS

- Fixed shelf quantities listed in () below; **additional shelf kits must be ordered separately.**
- 84" high cabinet will have the bottom two sections drilled for shelves; 90-96" will have all sections drilled.
- 93-96" high cabinets install on included detached toe kick box; order end skin for exposed side.
- Doors up to 36" high receive two hinges per door; doors greater than 36" high receive three hinges.
- 84" high cabinet aligns with 18" high wall; 90" with 24" wall; 93" with 27" high wall; 96" with 30" high wall.
- 15-24" altered depth modification available in 3" increments.
- 9" toe kick modification available. See page 86.

UNIVERSAL ACCESS CABINETS

1. Back

1/2" (12mm) Woodgrain laminate rabbeted into ends, glued top and bottom with industrial hot melt glue. 32-1/2" height.

2. Braces

Full depth braces provide I-beam stability and convenient anchor points for counter tops.

3. Drawers

5/8" Solid dovetail drawers featuring 4-sided construction and captive 1/4" matching laminate bottom.

4. Drawer Guides

Features captive roller, (100 lb) epoxy-coated stay-closed side guides

5. End Panels

1/2" (12mm) Substrate with light maple wood grain interior, designated laminate interior.

6. Adjustable Shelves

3/4" Thick, edgebanded particle board shelves.

7. Frames

3/4" Thick and 1-1/2" wide kiln-dried hardwood, assembled under pressure with screws. Offers maximum strength and squareness.

8. Hinges

108° 6-way adjustable self-closing concealed hinges.

9. Floors

1/2" (12mm) Wood grain laminate encapsulated in dado; glued all sides with industrial hot melt glue.

10. Toe Kick

4-1/2" Toe Kicks with 3-1/2" inset on all ANSI/ADA compliant cabinets. Also available with 9".

Standard construction is shown above. Shelf clips not shown. Specifications subject to change without notice. Materials may differ depending upon cabinet construction.

REMOVABLE FRONT CABINETS

- Includes two hinges per door.
- Shelf not included.
- Removable panel not included on wall hung. Panels can be ordered separately, see page 78.
- Insert dimensions are 1 3/4" less on width and 1" less on depth than the outside cabinet measurements.
- 18" altered depth modification available.
- 34 1/2" height modification available. See page 86.
- Install instructions available upon request.

ORDERING / ORDER PROCESS

Smart Cabinetry customers can place orders by submitting an order form or by using our convenient Online Ordering System. Contact your Sales Representative with questions.

Ordering Using A Form

1. Direct your browser to smartcabinetry.com/forms.php
2. Fill in order information
 - "PO#" must be unique per order.
 - Door Style, Finish, and Construction type must be unique per order. A new form must be completed for additional options.
 - Use the notes field for order specific information. (ex: delivery instructions, delivery time, special cabinet modification, unit information, etc.)
 - Make sure to enter a delivery date, when the order needs delivered past our current lead times, or has a specific delivery request.
3. Save Order Form
4. Submit to orders@smartcabinetry.com

Order Process

The following process takes place for standard orders:

1. Order Submitted
2. Order Entered & Confirmation Sent
3. Change/Sign-Off Period of 24 Hours Starts
4. Order Scheduled at Current Lead Time
5. Order Purchased
12-14 Business Days before build date
6. Production Begins
7 Business Days prior to build date
7. Delivery Scheduled
3-5 Business Days prior to ship date
8. Order Built
Day cabinets are assembled
9. Ship Date
Day cabinets leave our production facility
10. Order Delivered
1-8 Days after ship date

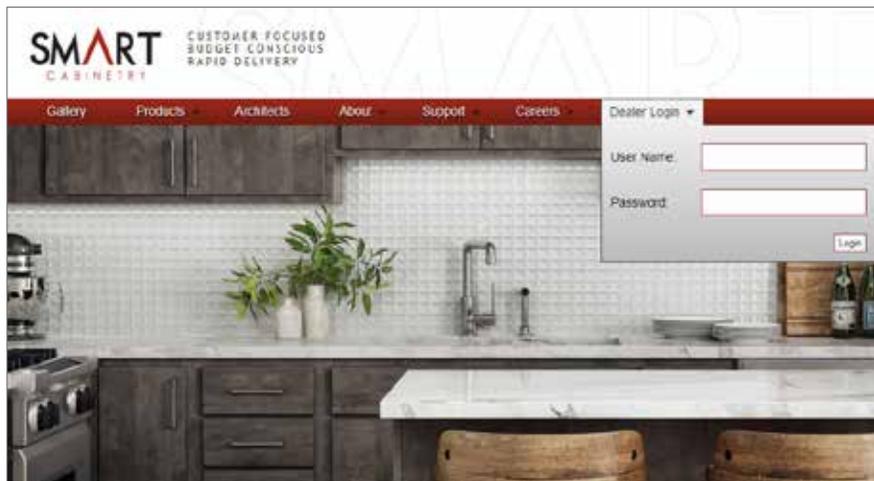

ONLINE ORDER ENTRY TUTORIAL

As a Smart Cabinetry customer, you have access to the Online Ordering System. We encourage all of our customers to utilize the Online Ordering System to ensure accuracy and an accelerated processing of your requested orders.

If you have questions regarding your customer account, please contact your Sales Representative.

1. Direct your browser to smartcabinetry.com
2. Enter your user name and password into the corresponding field, and press the "Login" button
 - Contact customerservice@smartcabinetry.com for this information
 - Our system is designed to work with most web browsers. For best results, please use either Mozilla Firefox or Google Chrome.

3. Dashboard overview:

NEW: To enter a New Order, JCO, or Quote, press the "New" button on the Orders section.

COPY: To copy an order, select the check box next to the order you would like to copy and press the "Copy" button. This will load the order into our system and allow for changes to be made. Only incomplete or not submitted orders may be copied at this time.

DELETE: To delete an order, select the check box next to the order you would like to delete. (You may select more than one)

SUBMIT: To submit an order, select the check box next to the order that you would like to submit. (You may select more than one)

4. Fill in order information:

Begin completing your order by entering the required data. All order information must be filled in before cabinets or accessories can be added to the form.

- "Customer Purchase Order Number" must be unique per order.
- Set a value for "Estimated Multiplier" to see your net cost updated in real-time.
- As items are entered, more lines will appear below.
- Items entered that do not exist in our online database will be highlighted in red. Items will be submitted to us, but no pricing or cubes will show until we approve or correct the item.
- To delete a line item, press the "X" to the right of the line.
- When finished press the "Continue" button.

5. Fill in shipping information. When complete press the "Continue" button.

6. Review you order:

- Check to be sure all items have been entered correctly. If you notice a mistake, press the "Edit" button to change items on your order.

FREQUENTLY ASKED QUESTIONS

When does my lead time begin?

Lead time begins after the 24 hour confirmation review and sign-off process.

Can I get an estimate for my shipping cost?

Estimates are available upon request. Please contact logistics@smartcabinetry.com for a quote. Freight estimates are valid for 30 business days from date of email sent to customer. Freight estimates are calculated and quoted by the most economical mode of transport.

How do I know when my cabinets will deliver?

For the actual date of delivery, please contact the shipping department 3-4 days prior to the projected ship week listed on your order confirmation.

How many cabinets can ship on one truckload?

250-300 cabinets or 3,000 cubes are standard for one truckload (subject to change according to SKU sizes).

What additional services are available with delivery?

Services like lift gate and driver assistance may be available at extra cost. For a complete list of accessory charges contact logistics@smartcabinetry.com.

What if my shipment is damaged?

Upon delivery notify the delivery driver of the damage and request that he/she make a note of the damage on the Bill of Lading (BOL). Sign the BOL, as proof of delivery and include identified damage noted on signed BOL. All damaged items need to be accepted by the customer. Do not reject damaged items.

For instructions on how to file a claim, please review page 96.

Smart Cabinetry cannot be held responsible for any labor costs accrued during the installation of products sold via any of its channels of distribution due to claim. This includes, but not limited to, items that may be flawed or have become damaged in transit.

NOTES: *This policy does not cover freight damages or shortages due to shipping of a product. Customer must receive product in accordance with Smart Cabinetry shipping and receiving policy, and may be required to submit information verifying the claim. These policies are set by our freight carriers, so failure to comply will result in loss of compensation for the customer.*

INSTALLATION TIPS

Do not store cabinets in moist environment.

Wood products, especially one piece cabinet doors, absorb excess moisture in the air and can expand. These minor changes in size due to improper storage are not covered by Smart Cabinetry's limited 5 year warranty. Store cabinets in a dry and conditioned environment.

Ensure the floor is level before starting any installation.

It will be necessary to locate any uneven areas and shim or scribe cabinets in order to make the installation plumb, true and square.

Start with wall cabinets & begin in a corner.

Measure from the corner to the first stud, and mark the measurement on the inside of the cabinet to be installed. Repeat this process for each and every stud. Drill a pilot hole through the back of the cabinet 3/4" down from the top and 3/4" up from the bottom. Fasten the cabinet to the wall with wood screws. Do not fully tighten the screws until all wall cabinets are in place.

Properly attach all wall cabinets to a soffit.

Affix to a permanent structure by running lag bolts through the top face frame into the "2 x" structure directly overhead.

If soffit does not exist, the cabinets must be attached to an adjoining cabinet which is affixed to a permanent interior structure. For end of run cabinets, install a tall end panel and attach to its frame establishing a "permanent" fixture which supports the cabinet.

When installing a blind cabinet, make sure the cabinet is pulled out from the wall the appropriate distance as called for in your kitchen plan. See page 34 and 45 for guidelines about blind cabinet pull distances.

Adjust cabinet doors easily with a Phillips Screwdriver.

Rotate the micro screw nearest the door to adjust side to side. Loosen middle screw, align door, and tighten the screw to adjust the door's height. Finally, rotate the cam screw near the inside of the cabinet to adjust the depth of the door.

Find a more in depth installation guide, visit our website: smartcabinetry.com/cabinetinstallation.php

CLEANING & CARE

A soft cotton cloth dampened with warm water is usually sufficient to clean your cabinets. If more thorough cleaning is required, use on the following cleaning solutions:

- Mixture of dish washing liquid and warm water.
- Mild all-purpose cleaner. Make sure it does not contain ammonia, silicone, or acid.

Use the mildest cleaning solution that will successfully clean your cabinets. Stronger products may damage or discolor your cabinet finish and are not recommended. After cleaning, wipe all surfaces with a clean, damp cloth. Dry immediately using another soft, clean cloth.

The cabinetry you have selected has its own personality and character, as well as a richness and depth in its color and grain.

You may notice the variations in the grain and color of your cabinet if you have selected a natural or light finish.

Variations will be less apparent with darker stains. Your cabinets have been constructed from carefully selected quality hardwoods. Because imperfections are part of the natural beauty of hardwood, and not the result of the manufacturing of your cabinets, your warranty cannot cover differences in color, grain and other natural variations. Nor can it cover possible differences in color when adding new cabinetry to old.

We encourage you to enjoy the natural beauty of solid wood and appreciate those characteristics that give it personality.

Splatters & Spills

Clean spills and splatters immediately. Prolonged exposure to spills, including food, water, other liquids, oil, and grease splatters can cause permanent discoloration or damage to your cabinet's finish.

Cleaning Products to Avoid

Avoid using the following products on your cabinets:

- Harsh chemicals including ammonia and bleach.
- Abrasive cleaning products such as tub and sink cleaners, scouring powder, scouring pads or steel wool.
- Sponges or dish clothes. They may contain particles that could scratch your cabinets, or they may contain food and oil residue.
- Solvent-based or petroleum-based products such as mineral spirits, nail-polish removers or paint thinners.
- Silicone-based cleaning, waxing or polishing products.

Regular Dusting

Use a clean, soft and lint-free cotton cloth for regular dusting. Packaged dusting sheets are not required or recommended. Do not use pre-moistened dusting sheets, and do not use aerosol products made for dusting.

Waxing & Polishing

Waxing is not required or recommended. Over time, waxing and polishing compounds may build up on the surface of your cabinets and cause a hazy, streaky or yellowed appearance.

Cleaning Glass Doors

Extra care is required when cleaning glass doors. Spray an ammonia-free glass cleaner on a clean, soft, lint-free cloth or paper towel. Do not spray cleaner directly on the glass. It could seep behind the window dividers and cause damage.

Scratches, Gouges, & Nicks

A touch-up kit is available to hide surface damage. Contact the sales representative or distributor where you purchased your cabinetry to purchase the color-matched touch-up kit for your specific cabinets. Use the kit's touch-up pen to hide minor blemishes. Use the kit's tinted putty stick to fill deeper scratches, gouges or nicks. Detailed instructions are provided in each kit.

Avoid Moisture Damage

Avoid draping damp clothes or dish towels over cabinet doors. This moisture can cause permanent damage, such as peeling and discoloration, to the cabinet's finish.

Avoid Heat Damage

The heat generated when using an oven's self-cleaning feature is much greater than during normal use. This heat can damage nearby cabinetry. Although this is a rare occurrence, you can minimize the risk of heat damage by removing cabinet doors and drawers nearest the oven before using its self-cleaning feature or by installing heat shields.

See page 82.

Avoid Light Damage

Exposure to direct sunlight tends to darken the color of natural wood products. Sunlight can also fade painted wood surfaces. You should consider draperies or blinds to shield your cabinets from direct sunlight.

Additional information about your cabinets can be found at:

smartcabinetry.com/cabinetcare.php

MINOR REPAIRS

You may encounter some unavoidable situations that create minor problems with your cabinetry. Before calling your dealer/installer for help, consider the following:

Minor Scratches or Dents

Minor scratches or dents in your cabinetry can be treated with a touch-up kit. For major damage like severe scratching, broken doors or drawers, paint spills, etc., call your dealer for help or replacement.

Loose Screws on Hinges

You can achieve a temporary fix by gluing a small diameter dowel rod into the hole using a high quality wood glue. Cut the dowel rod flush with the top of the screw hole and place into the hole. Let the glue dry and then replace the screw. Do not over tighten, or you will risk stripping it out again.

Minor Door Alignment Issues

Minor door alignment issues can be corrected by adjusting the hinges. You can achieve a temporary fix by gluing a small diameter dowel rod into the hole using a high quality wood glue. Cut the dowel rod flush with the top of the screw hole and place into the hole. Let the glue dry and then replace the screw. Do not over tighten, or you will risk stripping it out again.

Minor Roughness

Minor roughness in end grain can be corrected with "light weight sanding paper" and top coat. If concerned please call dealer.

In most cases your cabinetry is protected by our five year guarantee from the hardware manufacturer. For hinges and hardware that do not work properly, contact your dealer for assistance.

Adding Additional Cabinetry Later

When adding additional cabinetry in the same room at a later date, consider the following:

To help minimize the color differences between any old and new units, place the new cabinetry on a different wall, so any color difference won't be as noticeable.

Replace existing trim and molding with darker/lighter wood to give the old and new cabinets a unified look. Experiment with multiple finishes in the same wood species for a new look.

DISCLAIMER ON FINISHES

Painted finish Agreement (provided by dealer/distributor) to be signed by customer before finalizing any orders containing special finishes.

All wood products naturally expand and contract with changes in temperature and humidity. This natural movement may cause painted finishes to develop separation lines or breaks where any two pieces of wood join together. These breaks may become more noticeable as time passes. Like other finishes, paint is also susceptible to changes in color due to exposure to natural light, extreme heat, smoke, and abrasive cleaners. Areas with additional contact with water or fluids onto doors or drawer fronts could break-down the finish with overexposure.

Therefore, for the reasons stated above, the warranty of Smart Cabinetry's painted product (special finishes), STRUCTURALLY, is one year from date of purchase. However, there is no warranty and there is no implied period to warranty noticeable imperfections as discussed above.

Separation of Door Corner

Separation of Frame Joint

Separation of Door End

TROUBLESHOOTING GUIDE

Some problems that may arise during installation can be remedied with the following troubleshooting table.

IMPORTANT: It is not advisable to install cabinets wider than 36 inches or deeper than 12 inches on a wall independently. If essential to ones kitchen, the installer of the kitchen must secure the cabinet to a permanent structure, i.e. interior wall.

IMPORTANT: Structural modification of a wall cabinet can significantly weaken the cabinet. For this reason modifications to Smart Cabinetry are not recommended, such as cutting the back to clear wall obstructions. If an obstruction exists, we suggest you first try to use cabinet(s) that do not require modifications. If modification is required, the warranty of the cabinet is void and it is the responsibility of the installer to take appropriate steps to compensate for any loss of strength or support due to the modification.

SOFFIT EXISTS: Install permanently to a soffit by running four #10 lag bolts 3" in length through the top face frame into the "2x" structure (x4, x6, x8 or larger and a minimum) directly to the overhead structure or ceiling joist.

SOFFIT DOESN'T EXIST: The cabinets must attach to an adjoining cabinet which is affixed to wall or permanent interior structure. If it is at the end of a cabinet run install a tall end panel (TEP) and attach to its frame establishing a "permanent" fixture supporting the cabinet permanently attached to the TEP which is permanently attached to the floor.

Failure to follow these instructions will void all warranties. The result could be the cabinet falling off the wall which becomes a liability not warranted by Smart Cabinetry.

TAHOE | MAPLE & HDF | FULL OVERLAY | PAINTED IN IRON

Problem	Cause	Solution
Doors on a double door cabinet do not line up	Hinges are in need of adjustment	Adjust hinges until cabinet doors line up properly. Consult www.smartcabinetry.com/hardware.php for information regarding hardware adjustment.
	Cabinet is out of square	Loosen screws in back and use shims to make the cabinet plumb. Re-tighten screws. Over tightening screws will damage the cabinet backing. Slowly tighten until the head of the screw is flush with the back of the cabinet.
Door is not flush to the face frame	Hinges are in need of adjustment	Adjust hinges until cabinet doors line up properly. Consult www.smartcabinetry.com/hardware.php for information regarding hardware adjustment.
	Hinge(s) are twisted or bent	Contact your dealer for support.
	Cabinet door is warped	Humidity levels can cause warping. Allow door to hang through one heating season. If it remains warped more than 1/4", call your dealer.
	Cabinet is out of square	Loosen screws in back and use shims to make the cabinet plumb. Re-tighten screws. Over tightening screws will damage the cabinet backing. Slowly tighten until the head of the screw is flush with the back of the cabinet.
Drawer in not flush to the face frame	Drawer glide is misaligned	Adjust drawer guide until drawer closes flush against frame. Consult www.smartcabinetry.com/hardware.php for information regarding hardware adjustment.
	Cabinet is out of square	Loosen screws in back and use shims to make the cabinet plumb. Re-tighten screws. Over-tightening screws will damage the cabinet backing. Slowly tighten until the head of the screw is flush with the back of the cabinet.
Cabinet shelf is sagging in the middle	Shelf peg is not properly inserted	Adjust pegs accordingly, insert on the back side of the middle wood frame section (center mullion). Use all shelf pegs in their proper positions.
Scratches, nicks, or dents	Damage occurred during installation	Contact your installer or dealer, touch up kits are available for order through your dealer.
	Damage occurred during shipping	See page 90, "What if my shipment is damaged?"

CLAIMS INSTRUCTIONS

All claims must be initiated through a Smart Cabinetry customer (builder, dealer, or contractor). A Smart Claims Form can be found at smartcabinetry.com/forms.php. Claims are valid only when proper documents and documentation are provided. Documents include Smart Claims Form, Signed Bill of Lading (BOL), and pictures. To avoid delays in processing your claim, the correct original job number must be included on your Smart Claims Form. All claims and documentation must be submitted to orders@smartcabinetry.com.

Freight on claims paid at 100% will be covered by Smart Cabinetry. Freight on claims paid at 50% or that are fully chargeable will be billed at the customer's expense.

For questions regarding a claim, please contact customerservice@smartcabinetry.com.

Missing items Claim

MUST BE FILED WITHIN 7 BUSINESS DAYS OF DELIVERY

A missing items claim is made when item(s) are missing at the time of delivery and documented on the BOL. A copy of the signed BOL and notation of missing item(s) are to be included with the claims form.

Freight Damage Claim

MUST BE FILED WITHIN 7 BUSINESS DAYS OF DELIVERY

A freight damage claim is made when there is visible damage at the time of delivery and documented on the BOL. Pictures showing damage, a copy of the signed BOL and notation of the item(s) damaged are to be included with the claims form.

Concealed Damage Claim

30 DAY NO HASSLE GUARANTEE

A concealed damage claim is made when damage is not evident at the time of delivery but noticed upon opening of the item(s) packaging. Pictures showing damage and notation of the item(s) damaged are to be included with the claims form. Claims filed within 30 days of delivery will be paid at 100%. Claims filed after 30 days could be shared "proportionately" between organizations as a 50/50 split. Smart Cabinetry reserves the right to deny any concealed damage claims filed after 30 days.

Manufacturing Defect Claim

A manufacturing defect claim is made when defects are in direct correlation to a defective component or manufacturing error. Pictures showing the defect and notation of the item(s) defective are to be included with the claims form. Manufacturing defects will be paid at 100% in accordance with our Limited 5 Year Warranty.

It should be expected to see differences in wood characteristics on maple/oak cabinetry. Wood characteristics that naturally occur include tiger striping, knots, or variations in wood color. Wood characteristics are not considered a manufacturing defect. For concerns with excessive variations, please submit pictures and a claims form. Smart Cabinetry reserves the right to deny any claim due to wood characteristic concerns.

WILMONT & CHELSEA | MAPLE & HDF | FULL OVERLAY | IN SAND & IRON

LIMITED 5 YEAR WARRANTY

We know that a great deal of time, thought and investment goes into the selection of your cabinetry, and we truly appreciate your decision to purchase Smart Cabinetry products.

In the unlikely event you encounter a problem with your cabinetry, we are ready and eager to assist you, subject to the terms of this Limited Warranty.

Smart Cabinetry, provides this Limited Warranty to the original customer that either directly purchases our products, or that purchases our products through their third-party builder, dealer, or contractor (“Customer” or “you”).

Statement of Limited Warranty

We firmly stand behind the quality of our products, and warrant to you, our Customer, that **our cabinetry will be free from defects in material and workmanship under ordinary use for a period of 5 years from the date of purchase.**

This Limited Warranty is extended to the original Customer only for use of the product within the United States. This Limited Warranty is not transferable. No changes or modifications can be made to this Limited Warranty except by a company officer.

Limitations & Exclusions

This Limited Warranty is limited to defects in material and workmanship and does not apply to:

- Damage caused by the improper installation of your cabinets.
- Damage, theft, or loss that occurs after we have properly delivered your cabinets to you, or your dealer, builder or contractor.
- Issues with other products used or installed in connection with your cabinets including, but not limited to, appliances, counter tops, or plumbing fixtures (including the costs to remove and reinstall such other products).
- Damage caused by misuse, abuse, neglect, accident, alteration, improper or non-residential use, exposure to moisture or extreme temperatures, or other environmental factors in your home, including smoke damage, failure to maintain or acts of God.
- Damage caused by ordinary wear and tear.

Naturally Occurring Variations

Wood Products: Our cabinets incorporate a variety of natural elements. Naturally occurring wood characteristics including, but not limited to, variations in color or grain pattern, mineral streaks and knots are not considered defects. Wood of all species is subject to the humidity and temperature of its environment and may expand or contract due to changes in weather, temperature, or climate. Due to these ordinary shifts in the environment, wood cabinetry may develop hairline cracks or separation or seam lines. These ordinary variations are not considered quality defects and are not covered by this Limited Warranty.

Wood Finishes: Color and finish may be affected by age, character of cabinets, and exposure to UV light, sunlight, smoke, household cleaners, and other environmental conditions.

Painted Finishes: Painted finishes have unique characteristics that differ from standard wood finishes. This includes hairline cracks, including, but not limited to, joints and seams, and some natural characteristics of the wood including, but not limited to, grain patterns, knots, and mineral streaks which will remain visible through painted finishes. As painted cabinet products age, the finish may mellow or discolor slightly. The degree of change to the original finish color is affected by the products' exposure to natural And artificial light and other environmental factors in the home.

Because of these natural characteristics, new and/or replacement cabinets may not match showroom displays, color chip samples, photographs in a catalog or website and/or existing cabinets in your home. Any such variations and changes to our products, whether present during production or which develop over time, are not considered defects and are not covered by this Limited Warranty.

Warranty Performance

In the event of a defect in material or workmanship within the terms and conditions set forth herein, we will repair or replace the product, at our sole option, without charge. If the affected product is no longer available, Smart Cabinetry reserves the right to: (i) replace the affected component with a new component of a similar style, or (ii) replace the affected component and any other component within the total product to achieve a uniform appearance with as similar and comparable product style and quality as possible to the original product.

We cannot guarantee that replacements will match the finish and appearance of the original product. Our warranty extends solely to the product. We are not responsible for the cost of: (i) removal of defective product, (ii) installation of repaired or replaced product, or (iii) removal or installation of appliances, plumbing, flooring, or other fixtures. Repaired or replaced product shall be warranted for a period equal to the remaining period of the original Limited Warranty on the product or for ninety days, whichever is longer.

Limited Warranty Disclaimer

THIS LIMITED WARRANTY SETS OUT THE FULL EXTENT OF SMART CABINETRY'S RESPONSIBILITIES, AND THE EXCLUSIVE REMEDY REGARDING THE PRODUCTS. ALL IMPLIED WARRANTIES, INCLUDING WITHOUT LIMITATION, IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, ARE LIMITED TO THE DURATION OF THIS LIMITED WARRANTY. IN NO EVENT SHALL SMART CABINETRY BE LIABLE FOR DAMAGES IN EXCESS OF THE PURCHASE PRICE OF THE PRODUCT OR FOR, WITHOUT LIMITATION, COMMERCIAL LOSS OF ANY SORT; LOSS OF USE, TIME, DATA, REPUTATION, OPPORTUNITY, GOODWILL, PROFITS OR SAVINGS; INCONVENIENCE; INCIDENTAL, SPECIAL, CONSEQUENTIAL OR PUNITIVE DAMAGES; OR DAMAGES ARISING FROM THE USE OR INABILITY TO USE THE PRODUCT. SOME STATES AND JURISDICTIONS DO NOT ALLOW LIMITATIONS ON HOW LONG AN IMPLIED WARRANTY LASTS, OR THE DISCLAIMER OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THE ABOVE LIMITATIONS AND DISCLAIMERS MAY NOT APPLY TO YOU. IF ANY PORTION OF THIS LIMITED WARRANTY IS HELD TO BE ILLEGAL OR UNENFORCEABLE, SUCH PARTIAL ILLEGALITY OR ENFORCEABILITY SHALL NOT AFFECT THE ENFORCEABILITY OF THE REMAINDER OF THE LIMITED WARRANTY.

Claims

Registration of your warranty is available to help expedite any claim, and will allow us to communicate to you directly regarding our products.

To initiate a claim, contact your builder, dealer, or contractor.

If you cannot initiate your claim through your place of purchase or if you have difficulty obtaining assistance, you may submit a claim in writing to:

Smart Cabinetry
Customer Service Department
70680 CR-23, New Paris, IN 46553
574-831-5010
customerservice@smartcabinetry.com

All claims must be submitted in writing and must specify all issues you have with your cabinets. Pictures are also very helpful to assist in processing your claim. Once Smart Cabinetry has had an opportunity to review your claim, we will, at our sole discretion, either replace defective cabinets and accessories or repair any defects in the cabinets and accessories within a commercially reasonable period of time.

Smart Cabinetry is a product of Smart LLC, located at 70680 CR-23 New Paris, Indiana 46553 and reached at 574-831-5010.

This Limited Warranty is effective for products purchased on or after March 1, 2024.
