2026 FRAMELESS LINE

CABINET FEATURES

SMART CABINETRY®

Standard Features

1. **Box Construction:**
16 mm nominal thick wood-based composite panel with designated matching laminate exterior and white laminate interior. Front face of cabinet is edge banded in designated matching PVC. Hanging rails and stretchers have a 4-dowel application.

2. **Back:**
3 mm nominal thick hardboard back with a white laminate interior surface. Back panels are dadoed into case construction and are fully captured on all cabinets.

3. **Top & Bottoms:**
16 mm nominal thick wood-based composite panel with white laminate exposed exterior surfaces. Cabinets will come with designated matching laminate interiors.

4. **Cross Support Stretchers:**
16 mm nominal thick x 127 mm deep wood-based composite panel running the width of most base and vanity base cabinets, with a designated matching edge band for front face.

5. **Hanging Rails:**
16 mm nominal thick x 127 mm deep wood-based composite panel. Hanging rails run the full width of the cabinet. Multiple hanging rails may be included depending on the cabinet height/configuration.

6. **Drawers:**
Standard: Solid Wood Drawer with Soft-Close
16 mm solid drawer feature four sided construction and captive 6.0 mm nominal matching laminate bottom. Includes undermount soft-close drawer slides (100 lb dynamic).

Upgrade: White Metal Drawer with Soft-Close
Undermount soft-close drawer slides (100 lb dynamic) are combined with 1.6 mm thick double-wall metal drawer sides. Bottom and back are white laminate 16 mm thick wood-based composite panels.

Value Option: Solid Wood Drawer with Epoxy
Includes epoxy coated drawer slides (100 lb dynamic).

7. **Adjustable Shelves:**
16 mm nominal thick wood-based composite panel with white laminate on both faces and white edge band on front edge.

8. **Hinges:**
Standard:
Heavy-duty, cam-adjustable, high-quality steel, concealed 6-way adjustable hinge with self-closing feature.

Upgrade:
Soft-close (gentle-touch), heavy-duty, high quality steel, concealed 6-way adjustable hinge with soft-close resistance.

9. **Toe Kick:**
Standard:
Fully integrated toe kick comprised of 16 mm nominal thick wood-based composite panel. 4-1/2" high with a 3-1/2" inset on all standard base cabinets.

Upgrade:
No toe kick box with adjustable legs.
